STEEL COMBINE AND LABOR.

It is claimed that labor wi. make war on the steel combine, which is right, provided it has a grievance to be disposed of that is capable of a peaceable solution in a lawful manner. There is something very peculiar about these quarrels between capital and labor when viewed in the light directed upon them by a disinterested

The difference when adjusted is heard of no more and labor seems to be fully satisfied when an arrangement is made. It will, when called after one of these quarrels, immediately move in the interest of capital to support its designs and schemes against the general public, which in due time reaches labor and another difference appears for adjustment.

As a rule capital can depend on labor to support its designs upon the general public, which is evident from the course pursued by labor from the beginning of disputes between organized labor and organised capital. These disputes take the form of family quarrels that become loud, when the disputed question takes an acute form. At the close of the difficulty it takes the appearance of a selfish dispute that has no more in it than the difference in dollars and cents there is between capital and labor.

There does not appear to be any underlying principle included in the dispute other than the difference of opinion there is involved upon the value of labor. When the difference of op- in this city and returned to Willow justed there seems to have been nothing more than the value per day of labor as claimed and disputed. When San Francisco without getting his the difference is adjusted organized capital can rely upon the support of organized labor when engaged in carrying forward its plans against mankind.

There seems to be between organized capital and organized labor the relation given to shear blades as they appear to come together when the general public is cut. While labor has the sympathy of those who are full of humanity in its struggles against the power matism. of organised capital, there is not that intelligent regard manifested by labor for its protection there should be, when opportunity is given to it, to make its power and intelligence known through action at the ballet box.

When organized labor takes a more advanced position than it occupies, it liems of Street and Town too will be more respected by organized capital. While it remains in a position to be used at pleasure by organized capital for the advancement and maintenance of its schemes against the general public, it will be regarded as a convenience for use in a case of emergency to secure ends, when the general public is involved, which is not to occupy.

Perfection, or even an approximation to it, should not be expected at the beginning of any great work that is new in all of its parts to those who have the work in hand for solution. Exceptions are easily taken by those who are not directly intrested, or who may be interested only in a remote degree. Time with its lessons which will enlighten the Muman mind upon required means tained from the Big Bill lead north of that should be used to meet encroackments upon the public, may be remote. It should not be expected that large bodies should take time by the forelock in the sense individuals do, who act with reference to meeting conditions which they believe will be present in the future.

Reforms come through centralisms forces, and time is necessary to centralize the forces of a large body. When centralization is secured effective movement is a result of combined force for a given purpose and a change is made, even to a complete revolution if demands require it should take that form.

There is neither chance nor hazard in the order of movement, which comes as provision is made through evolution of time and the actions of men for the development of the race. Evolution for the development of the race will become more speedy as intelligence is acquired and becomes more general.

It should be plain to the observing human family in review that the time is not present when work for the elevation of the race can be disposed of near Steamboat Springs of the Trucshort of periods of time. The work will kee River General Electric Power Comgo forward after the manner of the overruling First Cause, whose ways ergy into Carson from that point .are past-finding out for the accomplish- | Carson News. ment of any of His great purposes. There is not anything more plain in the order of things than the presence of a purpose connected with the human family. When we conclude to hasten the work of unfolding the ends of the Overruling Cause there will be an undertaking entered upon that will most surely fail in accomplishment. There will be cause for complaint, and complaines will be made about the work and plans of men, while the work of unfolding the designs of the Creator is going forward, but these complaints and causes for complaints will be a part of the erring work of the agents who are engaged in carrying forward to a completion the designs which includes eternal progresp in the work of the Creator of all things.

Man falls From a Train While in a Demonted Condition.

A man was taken off the 12 45 train morning in unconscious condition. His face was cratched and his head contused. He ustained his injuries by falling off the train at Lovelock.

The man's name was Noce, and he was on his way from the east to Clairville where his brother resides. His wounds are bing treated at the county

Fearing that there might have been foul play Officer Leeper was called in to investigate the case. He is of the opinion that the man was "car crasy,"

"This malady," is one of frequent oc" "This malady," he said, "is one of trequest occurrence. I have known of a number of similar cases where people who were unused to traveling became demented owing to the vibration of the train."

RENO STAR MINE PROVING A WONDER

Its Vast Ore Body is Rapidly Widening and Retaining its Surface Values.

Something about the wonderful relearned yesterday

known to be at least three or four feet wide, because not a bucket of waste has come out since last fall, and two

half the truth been known.

Where Bell picked up the lead he found the ere solid, consisting of a gravel-like substance saturated with chloride and knit together with black horn silver. In the few days since Bell made the strike he sunk his shaft fourteen feet and took out fifty tons of ore. A carload was hauled to the station yesterday that this little dab of ore is worth \$10,000 and, from the appearance of the stuff, he is not far from right.

the authority of Mr. Wedekind himself, the ore body has been explored to a width of 150 feet and no sign of wall or country rock. It is all pay stuff. A few thousands of dollars spent

in rcoss-cutting would undoubtedly throw millions of dollars' worth of ore

Judge Wren, one of the best posted men in this vicinity in mining matters, has carefully examined the workings and declares it as his opinion that mines ever discovered in the world. When it is developed there will be huncreds of men employed digging out the

The great mineralized dike above town, which is the Wedekind formation, will be explored to great depth in many places and, in all probability, extensions just as rich as the Reno Star will be found.

WEDEKIND

SUES BELL.

and to Recover \$10,000 Dama ;es.

A complaint was filed yesterday ning suit against C B. Bell, W. A. shops in this city. Sleep, John Doe, Richard Roe, James . A short distance northeasterly from Noe and Samuel Styles. The docu- the site of the car shops there is a ment states that the last our names spur from the main track under conare fictitious, and the real parties meant are unknown to the complain-

The complaint states that on the 10th day of April, 1900, and ever since, the plaintiff has owned that certain piece of ground known as the Reno Star claim, "together with all veins, ledges and deposits throughout their entire depth, the top or apex of which is inside such surface lines, although such | veins, lodes or deposits may so far depart from a perpendicular in their course downward as to extend outside the vertical side lines of said mining claim and premises."

The complaint further alleges that on and about the 10th day of April aforesaid C. B Bell and his associates removed fifty tons of ore from the vein, lode or deposit that has its apex withed and an injunction prayed for to prohibit the defendants from removing any more ore from complainant's

be built and the town of Reno will become one of the busiest cities in the

sured.

BUILDING

ent Around the N -C.-D.

The Nevada-California-Oregon Comafternoon by George Wedekind begin- pany has begun the erection of new car

> Reno Mill and Lumber Company for the present as a lumber yaid. The lumber company will receive lumber from the N-C-O road on this ground

The lumber will come chiefly from Plumas county, California, over the Sierra Valleys road, connecting at Plumas Junction with the N-C-O

construction at the present shops of the company, which will be required to meet a large increase in business which the road will secure through the extension made to its main line northerly during the summer.

on Monday next to do the final work in lines of the Reno Star mine, This required for the extension. There is ore is valued by the complainant at | not anything at this end of the line but improvement and work to provide means for handling the future enlarged business of the road.

A CHAPTER OF ACCIDENTS

There were notrains from the east esterdsy until late last night. The ause was a succession of wrecks on romontory Hill.

As nearly as can be learned from he uncommunicative railroad men, the acts are about as follows:

A freight train left the track at this point. The derailed cars were soon back on the metals and the train went on, leaving a badly bent rail.

Half an hour later another freight ame swinging down the hill and went nto the ditch. Then came No. 5, which

No one was seriously injured. Train: Nos. 1 and 5 were annulled.

Names of the Pupils Who Have Merited Position on the Roll of Honor.

Trustees, Gentlemen .-

I respectfully submit my report for the school month ending March 28th. The enrollment, exclusive of the kindergarten was 628, and including the kindergarten, 737.

A lively interest is being taken in school work in every department and good progress is being made.

The vacation for the State Institute will give the pupils a well earned rest, arid at Carson City all our teachers hope to get new ideas and fresh inspiration for our work.

ABOUT MINE AND MINER

Notes Gathered From Exchanges About This Indus-

try.

A report comes to Carson that a new discovery has been made at Tonapah, of Crocories which is said to be as important as the original locations. The report is accompanied by the prediction that Tonapah is destined to become the greatest camp in the history of Nevada.-

Rock from the Overman mine will soon be shipped to the river millscertainly good news for Empire and also for Carson.

Eight women comprise the total female population of the new mining camp at Tonapah.

The leasers at Tonapah pay their men \$4 per day for shift of eight hours, the conditions being that their pay has to come from the ore.

Leon M. Hall started the new elec tric hoist at the Yellow Jacket mine in Gold Hill yesterday afternoon and the machinery worked without a hitch or jar.

SAGEBRUSH OCCURRENCES

Interesting Happenings in the State Gleaned From Exchanges.

Three cases of smallpox are now re ported at Reed's station near Tusca-

The Independent says the smallpox quarantine is being openly violated at Elko and calls for the punishment of the guilty ones.

An arm was all that was found of

Fireman Highman, who was caught under a burning mail car in the wreck near Wells. One hundred and forty-five bales of

wool were shipped from Carson to San

Francisco yesterday.

The "Camel's Hair" Brush, "Contrary to the belief of most per ple, the camel's hair brush used by art ists has nothing of the camel in it. said a manufacturer of soft brushes to a writer the other day. "There was a time when real camel's hair was used for the purpose. The ship of the desert, however, has long been **superse**ded by the homely little squirrel. Not only is squirrel's hair very much less costly. but it is better, softer, more pliable and far more durable. At the present day It is doubtful if you could find a pound of camel's hair in all the brush factories in this country. However, there is no cause for fear that the graceful little squirrel will be exterminated. It is the European squirrel that furnishes the bair for the brushes, the covering of the American soultrel being too fur ry and soft for the purpose."-Washington Star.
